Date: 6/10
Time: 8:00 AM
Total number of pages including cover sheet: 1

Dear Patricia,

We received the news that you have given Point Foundation the grant we were hoping for. This will be a pivotal grant. We will put all of our effort into maximizing the leverage it will give us to achieve what you and we are seeking through the magazine. We are deeply grateful to you.

After much reflection on the work of Mr. Dee Hock, I am very impressed. When a new type of thinking and structuring human work and interaction comes to the fore, it takes a little time to feel it out accurately. I think what he has done is of major importance, if it is developed and applied in the right ways.

It also seems to me that it comes at a time that is particularly propitious. I think Mr. Hock knows this. We are on the edge of a looming domination by the, now, worldwide corporate structures. His new system is one of the few things I can think of that could counter and loosen what will otherwise be an unassailable centralized power system.

I'll be out of town for the next few days.

Thank you, again, so much,

T
